

## Collection Requirements – Broome, Western Australia.

All collections must be booked in advance with the Pickles staff to secure your position on a load schedule.

**Please note:** All the assets in this sale are situated on a working operational site. All Chain of Responsibility rules and regulations will be adhered to. The on-site operators can only agree upon collection dates and times that suit their daily activities and scope of work. This process can be done in the following steps.

1. If you are a successful buyer, once you have been invoiced, you have 7 days to contact either of the Pickles Staff contacts listed below to book your preferred collection day/time and date. Buyers are provided with a 30-day collection window, with the last available day being the **18th of July @ noon.**
2. Pickles will contact the onsite operators to ensure a suitable date and time can be locked in.
3. Pickles' staff will directly relay the decision to the buyer or transport company.
4. Once this stage has been agreed upon, the buyer will be given the onsite operator's details to have themselves or their transport company directly contact the onsite team regarding arrival time, delays, or cancellations.
5. On arrival, the buyer or transport company must provide a "Full Zero Balance Invoice" or a Pickles-issued Gate pass.
6. Your transport company cannot arrive at this site without following these steps. Please ensure all parties are aware of these collection requirements.
