

Transport Requirements – Broome, Western Australia.

Please note: As noted below, this site has strict guidelines regarding trailers, bolsters, headboards, tailgates, and PPE.

Please note: The site operators can refuse to load any trailer if the site-specific rules and requirements are not met and abided by. This will not be a penalty to INPEX, Onsite Operators, or Pickles Auctions Pty Ltd. Please ensure you are aware of all requirements before organising the collection.

Essential Truck & Trailer Requirements.

This is a single trailer loading site, and all road trains must split trailers into singles before arriving on-site. The single trailer is approved to keep the attached dolly.

Tubular & Pipe collection loose or wine racked:

- Solid headboard as pictured below.
- Bolsters reach the full height of the tubulars loaded.
- Load restraint exceeds the load weight.
- Straps are only on chrome tubulars.
- Dunnage spans the trailer's full width for multiple pipe layers.

INPEX

Solid Head Boards

- All trailers used for INPEX drilling scopes must have solid head boards not the standard "gate" secured with rope or the like.
- It has been identified there can be different styles used for different applications.
